1952
Launched as part of Eppstein Hardware

1992
Taken over by Siddons Ramset

2001
Purchased by ITW

2002
Launched barcoded bolts

2002
Launched Polybox Fasteners

2021
Launched new Black Bolts Range

2022
Refresh and rebranding of Zenith

SUSTAINABILITY

Our Sustainability Promise

Our sustainability promise as a division of ITW Construction Asia Pacific is embarking on a journey to achieve sustainable excellence, following the global guidelines and commitments.

As a market leader in the construction and hardware industries, we are making a promise to lead and inspire the hardware industry into a sustainable future. As we take this journey, we are focusing on reducing our packaging and creating innovative solutions to solve packaging waste.

We are active members of the Australian Packaging Covenant Organisation (APCO), a not-for-profit organisation leading the development of a circular economy for packaging in Australia.

“The Australian Packaging Covenant is a national regulatory framework under the National Environment Protection (Used Packaging Materials) Measure 2011 (NEPM) that sets out how businesses across Australia share the responsibility for managing the environmental impacts of packaging.”
– APCO

What does this mean for ITW Construction Asia Pacific? A wide selection of ITW Construction Asia Pacific’s leading hardware products

is designed for use in timber-constructed homes. We aim to keep products and materials in use by supporting natural system regeneration, ensuring our packaging is both renewable and sustainably sourced. We are continuing our journey towards a circular economy by increasing the use of recycled content in transit packaging and in-store packaging.

As members of APCO, we are committing to the National Packaging Guidelines 2025.

The 2025 Targets provide a framework for collective, national action on waste management, recycling and resource recovery for our product packaging. They include:

- 100% reusable, recyclable or compostable packaging.
- 70% of plastic packaging being recycled or composted.
- 50% of average recycled content included in packaging (revised from 30% in 2020).
- The phase out of problematic and unnecessary single-use plastics packaging.

Further to this, we are proud users of the Australasian Recycling Label (ARL). As a customer of ITW Construction Asia Pacific, you will see an increasing and swift change towards product packaging that uses the ARL.

The **Australian Recycling Label** evaluates all packaging components and provides accurate recycling instructions.

CORROSION PROTECTION

The ZENITH® range offers a diverse array of products that cater to a variety of different environments. The finish on our products provides varying levels of corrosion protection, depending on the application and environment.

Refer to the following chart to help you select the correct product for your application.

ZINC PLATED

Suitable for internal use or areas with limited outdoor exposure.

MODERATE

GALVANISED

Hot dipped galvanising provides corrosion protection where product is exposed to the outside elements.

HIGH

GALVANISED BLACK

Hot dipped galvanised base with two layers of black coating, this has double the corrosion performance of standard galvanising.

VERY HIGH

STAINLESS STEEL

Stainless steel provides superior corrosion protection in highly corrosive environments, such as coastal construction.

ULTIMATE

For more details on product application suitability refer to our application chart on pages 7-8.

**PRODUCT APPLICATION
CHART**

Refer to the application chart to help you determine which product is best for your building and hardware needs.
